Note 2 (30th May 2025): FAO named Consortia Members: Framework Extension (June 2025):

We will be extending Framework LAB5061 LU 'Lab Equipment (General)' for a maximum of 4 months, commencing from the Agreement's current expiry date of 15th June 2025. The framework pricing, scope and terms and conditions will remain the same as they are currently. The purpose of this extension is to continue providing members a compliant route to market for General Lab Equipment, whilst LUPC concludes the evaluation of the current tender exercise, which will result in the successor Framework Agreement to LAB5061 LU. We are in the process of collecting the co-signed extension letters from the suppliers, loading them up in the Documents section on Hunter. So far (Friday 30th May 2025). So far, the following suppliers have already formalised their agreement to this extension period: Avidity, Fisher Labmode, Medline, Merck, SciQuip, SLS, VWR and Wolfabs. The Buyers Guide with the definitive list of live suppliers will be updated for the 15th of June 2025. If you have any questions or any expiring Call Off contracts that you wish to enquire about, please email [a.ramirez@lupc.ac.uk](mailto:a.ramirez@lupc.ac.uk)

Note 1: At the time of writing (1st October 2024) this agreement is not available to members of APUC, who are in the final stages of awarding their own agreement, exclusive to APUC members. The APUC agreement will cover the same technical cope as LAB5061 LU.

### Responsible Procurement

SQ Stage: all bidders have signed up to LUPC's Sustainability Code of Conduct.

AQ Stage: Responsible Procurement was weighted at 15% of the overall total weighting of 100%. The 15% weighting was split across 5 AQ questions covering the following themes: adherence to the Sustainability Code of Conduct; supply chain mapping, social value, Environmental responsibility and Equipment Disposal.

Equipment Technical Validation: As part of the validation process the following RP related information was collected from suppliers, for each model of equipment submitted for validation by LUPC:

- Country of manufacture or assembly
- Power draw information (standby mode, low power peak power, asset life kilowatts)
- Rates of water usage, water recovery and water costs(for water purification systems)
- Environmental features of applicable products
- The environmental badges stamped on each model (e.g. Energy Star, LEAF, etc.).

Contract Management Stage: In September 2023, all framework suppliers completed a comprehensive Responsible Procurement survey, to collect relevant RP related accreditations, certifications and efforts carried out by suppliers and their supply chain. This information will be made available to members via the Responsible Procurement tool "LUPC RP Hub".
