Responsible Procurement

Responsible Procurement is an important consideration for this framework with a 20% weighting being apportioned during the tender process. This can be further increased to 40% using the desktop calculator should members sustainability requirements need to place further emphasis on this. Additionally, during the quality evaluation suppliers were asked questions covering the following areas:

Living wage
Reduction of reliance on virgin metals and recycling applications
Employee working conditions
Approach to ensuring conflict minerals are not used in production processes
Supply Chains in accordance with ETI Base Code
