Further Competition

Responsible Procurement

Responsible procurement questions were asked in the ITT evaluation considering approach to sustainability and social awareness.

Minimum standards were set on the use of Net Positive Futures, the creation of an action plan and this will also be discussed and monitored at review meetings.

All bidders have confirmed status with relevant industry licences and undergone significant technical evaluation on processes and procedures.

Added Value

Additional aggregated rebates are available that bidders have committed to should they receive higher levels of work than set turnover within a financial year. These are collected and redistributed by regional consortia following the conclusion of each financial year.
